

Kayacelon React Yellow CN-4G

NIPPON KAYAKU

«Characteristics»

- Kayacelon React Yellow CN-4G is neutral pH fixation reactive dyestuff.
- It is a reactive dye that does not require the addition of alkali and fixation occurs by increasing the temperature.
- When used in combination with disperse dye that can be neutrally dyed, one bath dyeing of Polyester and cellulose blended fibers become possible.

☆Color Fastness (Cotton 100% ; 130°C Dyeing, pH 7) *Evaluated using JIS L 0804 Grey Scale

Dyeing depth	Light		Perspiration/Light	Washing (ISO Test 2 : 50°C)		Chlorinated Water 10ppm
	ISO 4 Grade	AATCC 20 AFU		Change in shade	Staining on	
			ISO (Alkali)		Nylon	
0.5%	5*	4-5*	3-4	4-5	4-5	2

Light : ISO 105-B02(Xenon-arc Black panel : 53°C) & AATCC 16-3(Xenon-arc Black panel : 63°C)

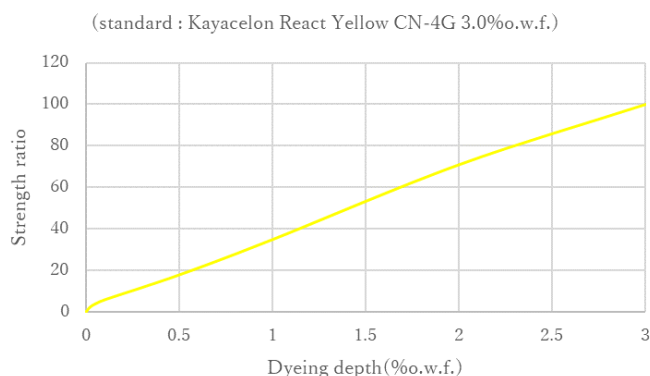

Perspiration/Light : ISO (Xenon-arc) Chlorinated Water : JIS L 0884 10ppm

☆Dyeing pattern (Cotton 100% ; 100°C Dyeing, pH 7)

[Color Sample]

[Strength ratio and the value of L*a*b*]

%o.w.f.	L*	a*	b*
0.03	91.63	-1.90	11.02
0.1	90.81	-2.85	20.90
0.5	89.04	-3.40	37.28
1.0	87.40	-1.90	50.55
2.0	84.96	-0.24	63.10
3.0	84.12	2.36	70.69

*There is no intentional addition of the components corresponding to restricted substances listed by OEKO-TEX STANDARD 100, Edition 2/2019.
